

Al-Iman School

Muslim Heritage Project

Syllabus 2018 - 2019

Project Goals and Objectives

Recognize how Islam has made an impact on modern day society and identify the many contributions that Muslims have provided in the service of humanity.

InshaAllah, this learning project will help our students develop a sense of pride and satisfaction towards the Islamic faith and inform them of the unique integration of religion and science.

Project Description

Al-Iman School Muslim Heritage Project is a research-based project designed to inform students and adults alike about the rich Islamic heritage we share as followers of the Islamic faith. Through study and research we will uncover over one thousand years of scientific, medical, technological and cultural achievements Muslims have contributed to the world. Students will be divided into pairs of two and given guidelines to research the Islamic civilization from the 7th to 16th century, known as the "Golden Age of Muslim Civilization. We believe that this learning experience will help our students understand the true worth of Islam and the role it has played in laying the foundation for the modern world.

Four Phase Research Project:

1. **Reading assignment:** Middle School students will select a topic of their choice and conduct research.
2. **Research paper:** Students will write a five-paragraph essay on a selected topic of Muslim heritage. The research paper must explain how Muslim inventions or discoveries of the past have contributed to establishing a foundation for the modern world.
3. **Tri-fold Board:** Each team will be required to construct a tri-fold board and display their finding along with their five-paragraph essay during display week (Oct 22 - 26).
4. **Oral Presentation:** Each student teams will prepare a PPT or Google slides presentation and give an oral presentation about their research and findings.
